AUTOMATION & PROCESS IMPROVEMENT PROJECTS

➤ **Inventory Management System — Google Sheets + Barcode**

Designed a customizable barcode-based inventory system with real-time stock visibility, transaction history, category controls, future stock planning, and SKU-level low-stock WhatsApp alerts.

➤ **Amazon & AJIO SKU Label Printing Tools — Python / Google Colab**

Built warehouse-friendly SKU label utilities to extract and print clear, large-format SKU information from marketplace orders, reducing picking confusion and manual dependency.

➤ **Delhivery & Shiprocket Bulk Shipment Tracker**

Created a Google Sheets-based tracker capable of monitoring thousands of AWBs and generating daily WhatsApp alerts for prepaid RTO shipments to support faster recovery action.

➤ **Bulk PDF Image Extraction Tool — Python**

Developed an offline utility for extracting images from very large PDF files, including 500 MB+ documents, without relying on paid online tools.

➤ **Attendance & Workforce Management System — HTML + Google Sheets**

Designed a workforce system with employee login, login/logout time, GPS location, working hours, leave tracking, attendance status, and performance metrics.

➤ **Custom Excel & Google Sheets Automation**

Created reusable formulas, dashboards, and logic frameworks for operational reporting, calculations, data validation, and repetitive workflow automation.
